TUCK'S POST CARD

CARTE POSTALE — POSTKARTE

By Appointment.

In an Ice Dry Dock. Vessels of moderate size or of shallow draught can be repaired in winter time by having the ice cut away round about them, and it is possible by careful management to get the ice-docks so deep as to enable the workmen to get right under the boat. The vessel shown, was built at Brentford, and on this occasion the ice was excavated to a depth of five feet.
